

About FieldVu Express

FieldVu Express is a single, cohesive software system that enables workflow and processes to help you grow your business profitably.

We have been helping industrial field services companies grow and succeed for many years by providing centralized business management systems. Disparate and mismatched systems that don't link together or talk to each other cost companies vast amounts of time and money. FieldVu Express is an all-in-one software system created specifically to help smaller industrial field service companies with:

Field Tickets

Seamless one system tracking that populates billing, payroll, inventory and more in one entry

Job Costing

In real-time know job by job, customer by customer are you making money – or losing it?

Unit Costing

This profit and loss statement by asset tells you what assets are more in demand and what it costs to operate those assets

Work Orders & Maintenance

Manage service and repairs on your field service equipment and set up maintenance programs

Third Party Billing

Never miss billing back to your customer again – control 3rd party billing

Rentals

Manage your rental process including scheduling, dispatching and billing

Financial Management & Reporting

Grow your business with accurate and up-to-date financial data and real-time reporting

Supply Chain Management

Manage all of your procurement needs, including purchase orders

See the Whole Picture

In the highly competitive industrial field services industry, there's only one way to survive: **be profitable**. It's essential to have complete command of your business to ensure your business is meeting its strategic growth targets.

Cost:

What does it cost to run your equipment and employ your people? Do you know your key costs every month? Are they increasing every month without knowing why?

Profit:

Which parts of a project make or lose you money? Do delays result in an erosion of your margins? Do you know all the factors that affect your profitability?

Time:

How many hours are on each piece of equipment? How many hours are your staff working? Are they working under or over capacity?
