

FieldVu IIoT for Asset Management

Connected Assets for Efficient Scalability

Gain Visibility With IIoT | Automate Asset Management | Improve Profitability

INCREASE PROFITS WITH IIoT AND AUTOMATION

Managing a large number of equipment & assets can be a costly burden. Unnecessary down-time, a lack of visibility, and error-prone data entry put a strain on profitability. FieldVu IIoT leverages IoT sensors & data to provide complete visibility into assets while enabling enterprises to fully automate processes. That means less manual work for your staff - but more profits for your business.

We wanted to automate as much as possible. FieldVu allows us to be able to get there and do that. It's extremely efficient. It's given us a lot of scalability and quicker turn-arounds.

Alan White, Director of I.T., SEF Energy

Gain Visibility

Decrease asset down-time and get full transparency into usage.

Automate Processes

Eliminate data re-entry to speed up processes while preventing errors.

Streamline Efficiency

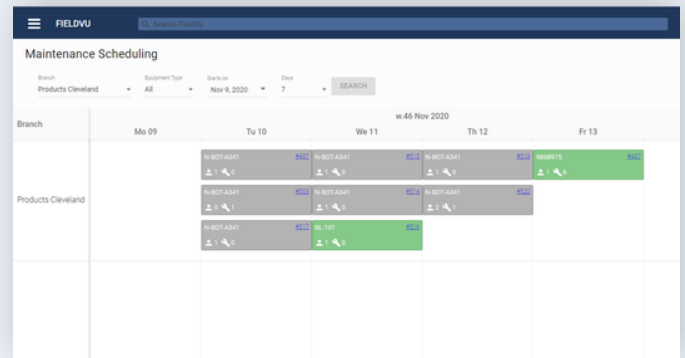

Reduce resources needed to scale operations. Get detailed data for decision making.

Grow Market Share

Deliver improved customer services and differentiate from competitors.

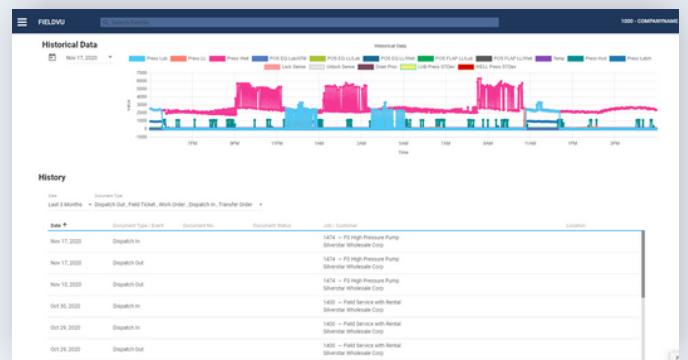

INSIDE FIELDVU IIoT

PREDICTIVE MAINTENANCE

Move away from reactive maintenance to save time & money by fixing the issue - before it's an issue.

- Collect key maintenance data using IIoT sensors.
- Predictive maintenance suggestions & alerts.
- Automated maintenance work orders.

AUTOMATED OPERATIONS

Recapture time for higher-value tasks by automating repetitive, error-prone work.

- Automate processes such as resource dispatch, invoicing, and Accounts Payable.
- "Smart" equipment is responsive to the real world.

DRIVE INNOVATION

IIoT Sensors

Asset maintenance and usage data is collected by sensors.

Cloud

Data is inexpensively stored in the cloud and processed in real-time.

FieldVu

Data is presented in FieldVu for management or automation.

ERP

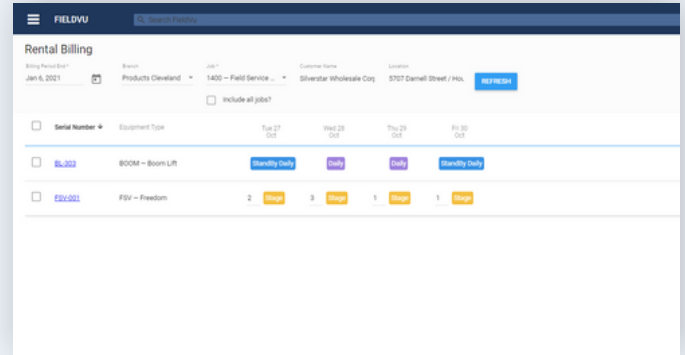

Data flows to ERP for fast & accurate consumption based invoices.

Customers

Give customers improved services and a stronger user experience.

Your Business

Scale projects with a more efficient and profitable business model.

CONSUMPTION BASED BILLING

Accurate invoices ensure correct payments are made faster, with less administrative work.

- Data from sensors for consumption based billing.
- Automated invoices prepared with a single click.
- Integrated with ERP to eliminate data re-entry.

PROVEN RESULTS

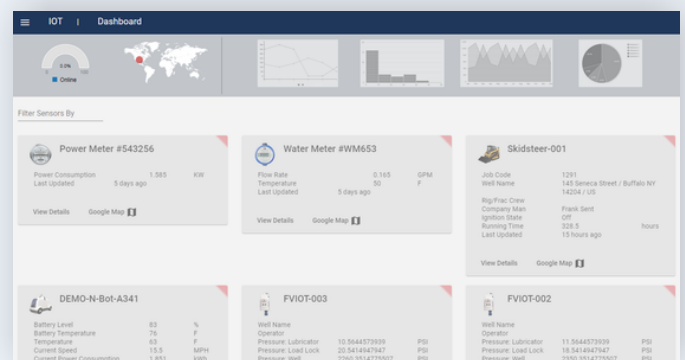

13 Million+ data points managed per day for a single customer by FieldVu.

3x Faster time-to-market for an asset rental solution with IIoT and Automation capabilities.

93% Reduction in materials required for maintenance of an asset after implementing IIoT.
